

MAINTENANCE MANAGEMENT POLICY – OWNER/DIRECTOR

In order to provide a safe, reliable transport service, I understand, and am committed to maintaining a safe, reliable and roadworthy vehicle through a properly planned and executed maintenance program in accordance with Western Australian Heavy Vehicle Accreditation.

I will only use vehicles belonging to others that are accredited vehicles covered by a Maintenance System meeting Western Australian Accreditation requirements.

This maintenance management program is structured on, and adheres to, the requirements of Main Roads WA Accreditation and the NHVAS scheme and includes a start-up procedure, daily vehicle check, planned services, regular roadworthiness inspections and effective fault reporting and rectification.

The procedures outlined in this manual are a true account of

(name of company)

maintenance practices.

Signed:

Owner/Director
